MATTEO DE RINALDIS

Senior Frontend Engineer

7+ years of experience building enterprise web applications using React, TypeScript and modern frontend architectures. Experienced in scalable UI development, component libraries, REST API integration and Agile environments, with strong technical ownership of frontend modules and applications. Proven track record of delivering high-quality solutions for banking, lottery and industrial sectors.

TECHNICAL SKILLS

Frontend Technologies | React • JavaScript • TypeScript • HTML5 • CSS/SCSS/LESS • Redux • Axios
Mobile Development | React Native • Expo • Cross-platform Development
UI Libraries & Components | Tailwind CSS • Bootstrap • Material UI • Ant Design • Storybook • PixiJS
Development Tools | Webpack • npm/yarn • Git • GitHub • BrowserStack • GitHub Copilot CLI
DevOps & Collaboration | Azure DevOps • Bitbucket • CI/CD Pipelines • Jira • Confluence • ServiceNow
Testing & Software Quality | Jest • Cypress • SonarQube • SonarCloud • Black Duck • Veracode
Design | Figma • Zeplin • InVision
Backend & API | Supabase • MySQL • REST APIs • Swagger
Security | Keycloak • Polaris
Methodologies & Practices | Agile • GitFlow

PROFESSIONAL EXPERIENCE

Codeway SA | Chiasso, CH **09/2022 - 09/2026**

Sisal | Development and maintenance of online lottery applications across more than 30 repositories. Analysis and implementation of UI/UX requirements, reusable UI components and business features. REST API integration, bug fixing and ensuring consistency across multiple repositories. Technologies and frameworks used include JavaScript, React, TypeScript, CSS, SCSS, Git, Webpack and GitHub Copilot CLI.

Gimac | Designed and implemented the project repository and back-office frontend architecture. Developed functional and UI features, integrated REST APIs and handled bug fixing. Independently managed the frontend platform and its ongoing development. Technologies and frameworks used include JavaScript, React, Axios, SCSS and Git.

Bip | Analyzed, designed and implemented the repository and core frontend architecture for a web-based management platform for an international law firm. Developed functional and UI features, integrated REST APIs and handled bug fixing. Independently managed the frontend architecture and ongoing development of the platform. Technologies and frameworks used include TypeScript, React, Axios, SCSS and Git.

Accenture | Developed new features and resolved bugs for an industrial manufacturing management platform. Ownership and evolution of the project's shared component library and core integration area connecting multiple modules. Served as Security Champion alongside development responsibilities. Independently managed end-to-end testing and software releases across development and testing environments. Technologies, frameworks and tools used include JavaScript, React, React Query, Redux, Axios, Storybook, Azure DevOps, Keycloak, Jest, Cypress, Black Duck, Polaris, Figma, SCSS, Git and Swagger.

iTuna / WebScience | Milan, IT **11/2020 - 09/2022**

Fabrick | Development of UI components and graphical integrations for the banking sector. Bug fixing, backend endpoint integration and customization of reusable dynamic components. Technologies and tools used include TypeScript, React, Less, Storybook and IntelliJ.

Bugnion | Development and enhancement of UI and business logic for a patent management platform based on a micro-frontend architecture, including backend API integration. Technologies and frameworks used include TypeScript, React, Piral, Redux-Saga, Tailwind CSS and SCSS.

Roche | Development and maintenance of a pharmaceutical presentation platform, including Excel-based calculations and integration of interactive charts. Implementation of UI features and business logic, with a focus on data visualization and user interaction. Technologies and frameworks used include JavaScript, jQuery, React, HTML, CSS, SCSS and Apache ECharts.

Cathedra Srl | Seregno, IT **04/2019 - 11/2020**

Faber System | Independent development and maintenance of a management platform based on an atomic frontend architecture and custom component library. Technologies and frameworks used include TypeScript, React, Redux-Saga and SCSS.

Gitto | Independent development and maintenance of a dynamic generator for customized legal contracts. Technologies and frameworks used include TypeScript, React, Redux-Saga and SCSS.

Enigaseluce | Redesign and implementation of UI and business logic for customer contract subscription workflows. Management of development environments and project management tools. Implementation of responsive frontend flows and cross-browser optimization. Technologies and frameworks used include React, Redux, JavaScript, CSS, Less, Sass and SCSS.

Fimelato | Development and maintenance of web pages with a strong focus on responsive design and cross-browser compatibility. Implementation and customization of frontend components and UI features. Technologies and frameworks used include DNN, Bootstrap, HTML and CSS.

Ant Srl | Milan, IT **01/2019 - 04/2019**

Java Junior Developer | Development and maintenance of internal software projects and development tools. Implementation of backend and frontend features, database integration and bug fixing. Technologies, frameworks and development concepts used include Java, Spring MVC, JDBC, DAO, MVC, design patterns, XML, UML, JPA, JavaScript, jQuery, Ajax, HTML, CSS, MySQL, PHP, Unity and C#.

EDUCATION

BACHELOR'S DEGREE in ENVIRONMENTAL ARCHITECTURE | Politecnico di Milano | Milan | 2013

SCIENTIFIC HIGH SCHOOL DIPLOMA | Liceo Scientifico Salvador Allende | Milan | 2007

COURSES

JAVA PROGRAMMING COURSE (Basic & Intermediate) | Ant Srl | Milan | 2018

LANGUAGES

ITALIAN | Native

ENGLISH | Professional working proficiency

GERMAN | Basic
